

AIAG-VDA FMEA Handbook 1 Day Course

Understand and implement the new AIAG/VDA FMEA handbook related to Design FMEA (DFMEA)

Objectives

- Understand the principles of undertaking risk analysis using FMEA
- Understand the AIAG-VDA 7 step approach to developing a DFMEA with a practical case study
- Understanding risk evaluation using the new tables for severity, occurrence and detection and the resulting action priority ranking (AP)

After short teach points, small groups work on developing a DFMEA using a case study.

Who should attend?

Delegates should have previous experience in developing FMEA's to get maximum value from the training.

Who will be the tutor?

The course will be delivered by Paul Hardiman, who has over 20 years' experience in training and consulting related to automotive quality systems (ISO/TS16949 and IATF 16949). Paul is a qualified trainer of third-party auditors for IATF 16949.
